

YOUR NEW PLAN FOR WORST CASE SCENARIOS

Prepare your facility for a range of emergency situations! This vital reference for utility managers, operators, consulting engineers, emergency response planners and professionals, and public officials helps stakeholders plan for a range of emergencies, respond when disaster strikes, and recover in the wake of infrastructure failure, natural disasters, human-induced accidents, and multi-hazard disasters. Learn about crucial regulatory requirements and the information you need to know to be resilient.

FEATURES & BENEFITS:

- Learn about the role of resilience in emergency planning
- Find vital information for managers at utilities of all sizes
- Contains guidance with both US domestic and international applications
