

Green Initiatives at WEF/AWWA The Utility Management Conference 2020

Sustainability Efforts throughout the Hyatt Regency Orange County:

- Window tinting film installed on glass in the atrium lobby to reduce solar heat load by 63%
- Participation in Southern California Edison's Demand Bidding Program
- Recycling bins provided in all guestrooms and throughout the hotel
- Turn off lights and HVAC when meeting room, guestroom or office is not occupied
- Utilize thermal storage tanks to reduce chiller run time by 15% in cooler months
- Chilled water setting based on desired return temperature of 52 - 53° to reduce energy consumption
- Water dispensing items rated as conservation devices: Low-flow toilets, showerheads and faucets
- Compact fluorescent lights in guestrooms and T8 fluorescent bulbs in service halls and offices
- Recycle paper, cardboard, plastic and glass
- Proper disposal of hazardous waste such as bulbs, batteries and computer hardware
- Multiple employee incentive programs for ride-sharing and conserving energy within the hotel

Food & Beverage Efforts

- Organic rooftop herb garden
- Strive to reduce food waste by accurately forecasting food quantity needs
- Provide condiments in bulk, and beverages in pitchers rather than individual containers if possible
- Purchase local and organic foods when possible

Housekeeping Efforts

- Each room is equipped with a digital thermostat set at 72°
- The drapes are closed to 12 inches to save on air conditioning
- Use of Green Safe Cleaning Products deemed environmentally safe
- Linen and terry cloth are washed every three days in stay-over rooms, unless otherwise requested

Introducing the Green Team

A hotel committee created with a commitment to conserve and protect the environment by ensuring that our hotel is reducing waste and conserving energy to its fullest potential.
