### The difference between Class A and B Biosolids

 <p>Used by <b>Home Gardeners</b> and the <b>General Public</b></p>	<b>CLASS A</b> <p>Virtually undetectable bacteria levels</p> 	<b>CLASS A EXCEPTIONAL</b>  <p>Not only meets Class A conditions, but exceeds quality in every respect</p>
	 <p>Extremely low metals</p>  <p>Very little odor</p>	<b>CLASS B</b>  <p>Low levels of metal that are similar to what's already found in soil.</p>
