

Celebrating 10 years of service

In that time

914
Volunteers
have been engaged in

Planting

9,200
Individual
Plants

Creating

5
Rain-
gardens

Building

6 Bioswales

What is a Bioswale?

a long, channeled depression or trench that receives rainwater runoff and has vegetation and organic matter to slow water infiltration and filter out pollutants

And

1 Outdoor
Classroom

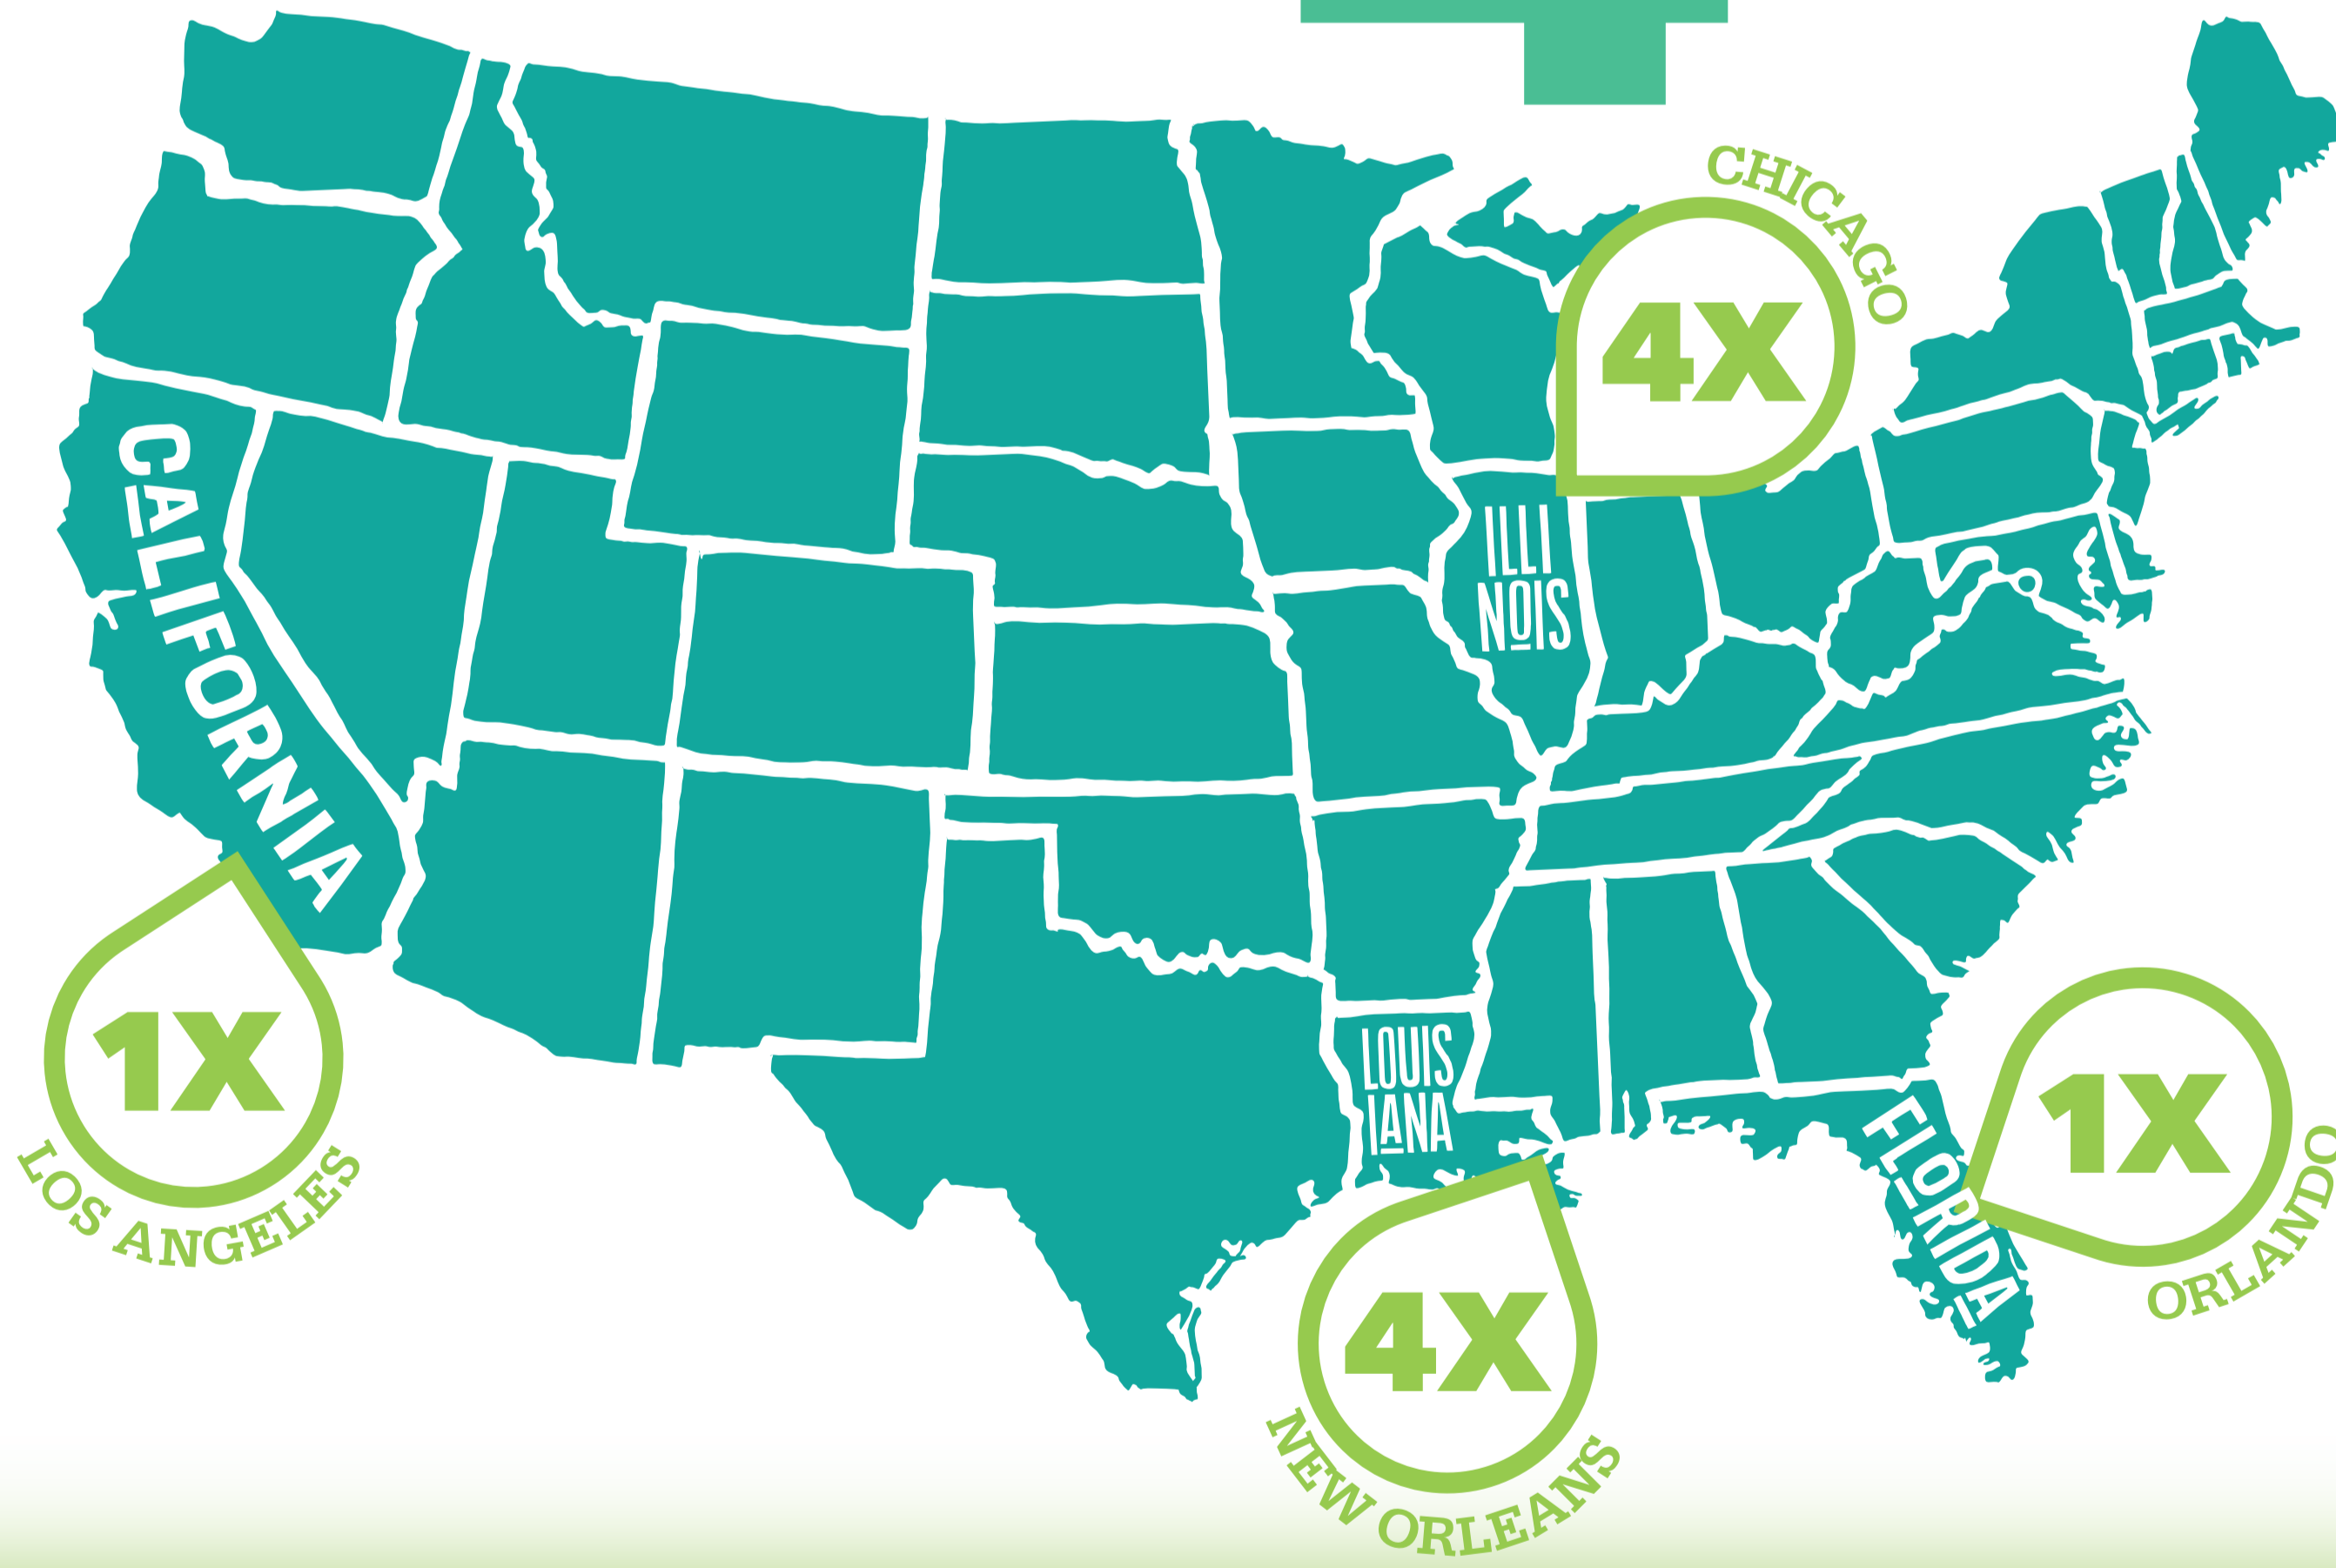

3,020
Students Engaged

Improvements have been made in

4 Major
Cities

Creating a total of
406,000 ft²
of Improved Space

None of which would be possible without generous donors, sponsors, and volunteers who raised

\$134,000
to improve the overall health of the environment
