SUBMISSION TYPES

INDIVIDUAL ABSTRACT
Individual abstract submissions should have an author, co-author(s) and a maximum of 2 speakers. All submitted abstracts will be reviewed and selected by the Program Committee. Those selected will be included as 10-to-20-minute presentations held during technical sessions based on topic/area of interest. **Accepted abstract authors will be required to submit a full paper for the conference proceedings.**

SESSION PROPOSAL
A session proposal submission should consist of a maximum of 3 speakers, 2 facilitators and a complete agenda (max of 90 minutes). The agenda must have a cohesive theme or topic with the goal to ensure knowledge exchange or development. Proposed sessions should also incorporate some form of interaction with attendees. Speakers selected for your session proposal should not all represent the same utility or organization but should come from different backgrounds and experiences. This includes not having all clients from one consulting organization or manufacturer. If selected, proposals will be held as technical sessions during WEFTEC. **Accepted proposals will be required to submit a collective session paper.**

FAQ: WHAT ARE TECHNICAL SESSIONS?

Accepted submissions will be made into technical sessions. All technical sessions are 60 or 90 minutes long and may include interactive activities such as polling, facilitated discussion, or other creative formats. Technical sessions can be composed of one session proposal or up to three individual abstracts. Selected abstracts will be grouped together within a technical session based on topic/area of interest.
